

Introducing the new Advanced Wicking Garden Bed.

**Thought that wicking
garden beds were
hard work?
Think again.**

The new range from Biofilta/ Kingspan Water of stylish Advanced Wicking Garden Beds means you can setup and plant your garden in less than 15 minutes. No more messing around with liners, rock base or geotextiles - the Advanced Wicking Garden Bed comes with a wicking tray and integrated aeration tubes. Just add wicking soil mix, plants and water.

URBAN FOOD PRODUCTION

Transforming cities into food bowls

HORIZONTAL FOODWALL

Biofilta/Kingspan Water have designed a fully sealed, raised, wicking garden bed that does not require traditional materials such as scoria, plastic liner or geotextile.

Biofilta's advanced wicking tray and integrated aeration gives maximum productivity and water storage, without the need for additional materials.

Available in 1.5m or 3.0m length as galvanised and the full Colourbond® range.

1.5m length x 0.95m width x 0.5m height, 200L water storage, 450L soil volume (to depth of 35cm) from \$850.

3.0m length x 0.95m width x 0.5m height, 420L water storage, 950L soil volume (to depth of 35cm) from \$1,250.

Advanced wicking garden bed with integrated root zone aeration for healthier plants.

Adjustable water level for optimal watering and maximum produce aeration for healthier plants.

Wicking Garden Bed Mix

Biofilta have specified a wicking garden bed mix to maximise the natural, self-watering/wicking process and boost plant productivity. Using the Biofilta mix ensures Foodwall performs at its best.

Delivery & Installation

Our courier partners and installation crew enable any space to be transformed into a sustainable food garden.

Save Time
Water once a week
Weed resistant

Save Water
Minimal evaporation
No run-off

Save Money
Grow organic & healthy food at home

Elegant

- ▶ Great for small courtyards and patios.
- ▶ Easily positioned anywhere in your garden.
- ▶ Comes in 1.5 metre or 3.0 metre lengths. Sizes tested and engineered to support the weight of the soil.

Sustainable

- ▶ Great lightweight alternative to treated pine (which can contain toxic chemicals), expensive hardwood and heavy concrete beds.
- ▶ Fully recyclable with low environmental footprint.
- ▶ Self supporting and will not degrade under the harsh Australian sun.
- ▶ Will not crack split or rot. 5 year structural warranty.

Convenient

- ▶ Fast delivery to your door. No assembly required.
- ▶ Less bending over.
- ▶ Natural drainage, allows for worm movement. Good for children, people with bad backs or the disabled.
